DETAILED ACTION

Claims 1-19 are pending in this application filed January 16, 2002.

Applicant's claims are directed toward solar radiation protection compositions.

The election of Group I-Claims 1-12, 14 and 19 to Restriction Requirement dated July 29, 2003 is acknowledged and hereby expressly made final.

Claim Rejections - 35 USC § 103

15.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

16.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klau et al. USP 3,920,834 in view of Gerwick et al. USP 5,508,026.

Klaui et al. discloses light screening compositions comprising carotenoids. In column 1 Klaui further discloses that amino acids may also be present. Klaui discloses each and every aspect of the invention as claimed by applicant in the instant invention with the exception of the polyphenolic compound.

Gerwick et al discloses indole-alkaloids useful as UV protective agents. In column 1, Gerwick further discloses that the polyphenolic compound, specifically scytonemin is present and provides strong UV absorbing properties. It would have been obvious to one of ordinary skill in this art at the time the invention was made to have employed the scytonemin polyphenolic compound of Gerwick into the compositions of Klaui et al. in view of its UV absorbing properties to provide a synergistic effect.
